Full-Stack Web Developer

.NET API, MVC, and Angular

Profile Summary

I am a **Full-Stack Web Developer** focused on **Software Architecture**. My specialties are C#, Asp.net Core, Angular, and Node.JS, using Typescript.

I am legally registered as a contractor (CNPJ holder) in Brazil.

I began my career in 2009 and graduated with a Bachelor's degree in Computer Science from Veiga de Almeida University (2014), and I have completed several additional courses in the area.

As a full-stack developer, I build web systems end-to-end: Front-end, Back-end, and Database.

On the front-end, I handle both the coding and the layout provided by UI/UX professionals, applying optimization and performance techniques with frameworks like Bootstrap and Material, as well as vanilla CSS/JS.

On the back-end, I have specialized knowledge of architectural patterns and styles, DDD, clean and organized code, and knowledge with unit, integration, and acceptance testing. I am also knowledgeable in microservices.

In database management, I work with queries, data and table modifications, modeling and optimization, using indexing and normalization/denormalization. I am familiar with T-SQL functions, views, procedures, and triggers and I also have knowledge of NoSQL.

For front-end to back-end integration, I use the REST pattern (Richardson level 2).

For back-end to database integration, I am proficient in the main ORM frameworks on the market: Entity Framework and Dapper.

For queueing, I have experience with RabbitMQ.

In Agile Project Management, I have advanced knowledge of Scrum, having studied for Scrum Master certification.

In DevOps, I am skilled in Git (Git Flow, GitHub Flow, GitLab Flow, One Flow), CI/CD concepts, Docker, and have some knowledge in Kubernetes and Azure Cloud.

I follow industry best practices, applying Clean Code, SOLID principles, familiar with the main design patterns (GoF and others) and a variety of architectural patterns.

I believe software development is an art.

Technical Skills

Technologies:

Front-end:

HTML5, CSS3, Sass, Javascript (ES5 and ES2015), TypeScript, ASP.NET MVC, Angular, AngularJS, Bootstrap, jQuery.

Back-end:

C#, ASP.NET (MVC and Web API/REST HTTP), .NET Core, Entity Framework, RabbitMQ, Identity Core (.Net Authentication), Javascript (ES5 and ES2015), TypeScript, NodeJS, Hangfire.

Databases:

Relational: SQL, MS SQL Server, T-SQL (Transact-SQL), MySQL, ER Model, ER Diagram, Stored Procedures, Views, Functions, Triggers.

NoSQL: MongoDB, Redis.

DevOps:

GIT (command-line), Docker, Docker Swarm, Kubernetes.

Testing:

Selenium, XUnit, Karma/Jasmine, SpecFlow, Cucumber (JS).

UML (Diagrams):

Use Case, Class, Object, Package, Sequence, Communication, State Machine, Activity, Interaction Overview, Component, Deployment, Composite Structure, Timing.

Patterns:

Design:

Command, Template Method, Strategy, Singleton, Monostate, Null Object, Factory Method, Abstract Factory, Observer, Adapter, Facade, Repository, Builder, DAO, Proxy, Promise, Module (Javascript), Unit of Work.

Architecture:

DDD, Clean Architecture, CQRS, BOLOVO (BLL), Event Sourcing.

Code Quality:

Clean Code, DRY, YAGNI, KISS.

Agile Methodologies:

Scrum, Kanban, XP, TDD, BDD.

Academic Background

Universidade Veiga de Almeida (Veiga de Almeida University)

Bachelor's in Computer Science

Start: 2009 – Completion: 2014

Additional Courses

I have taken numerous courses primarily with “Eduardo Pires - Treinamentos e Consultoria” (Eduardo Pires - Training and Consulting), “Desenvolvedor.IO” (Developer.IO) and “Alura”.

On these platforms, I have completed countless courses on topics including Asp.net, JavaScript, Angular, Software Architecture, Testing, DDD, TDD, Scrum, Node.js, Databases, Design Patterns, best practices, performance, DevOps, and more.

I was also an Alura Língua subscriber, completing level 5 (advanced) in English.

Listing all courses would be excessive, so I created an appendix at the end with the most important ones. Here are links with full certificates from the three platforms:

- [Desenvolvedor.IO](#)
- [Alura](#)
- [Alura Língua](#)

Books

Some books that have been crucial to my career include:

- **Clean Code: A Handbook of Agile Software Craftsmanship**, *Robert Martin*
- **The Clean Coder: A Code of Conduct for Professional Programmers**, *Robert Martin*
- **Agile Principles, Patterns, and Practices in C#**, *Robert Martin*
- **Scrum: The Art of Doing Twice the Work in Half the Time**, *Jeff Sutherland*
- **Test-Driven Development: Real World Testing and Design with .NET***, *Mauricio Aniche*
- **eXtreme Programming: Practices for Agile Software Development***, *Daniel Wildt, Dionatan Moura, Guilherme Lacerda, Rafael Helm*
- **Agile Metrics: Achieve Better Results with Your Team***, *Raphael Donaire Albino*
- **Domain-Driven Design: Tackling Complexity in the Heart of Software**, *Eric Evans*
- **UML 2: A Practical Guide***, *Gilleanes T. A. Guedes*
- **.NET Microservices: Architecture for Containerized .NET Applications**, *Cesar de la Torre, Bill Wagner, Mike Rousos* (currently on hold)

**free translation.*

Languages

Portuguese: Native.

Spanish:

Intermediate - spoken, written. *Advanced* - reading, comprehension.

English: Intermediate / Technical (Good reading comprehension, but not yet ready for live conversation).

Professional Experience

Company: MeuCashCard

Consulting Firm: SquadPremium

Start Date: December 2024 (current)

Description: Tech Lead and Fullstack Developer (.NET and Angular)

Activities: Acting as a Tech Lead in a team of 7 developers, assisting the team in task development, understanding the architecture, maintaining best practices and company conventions, performing Code Reviews (Pull Request analysis), leading ceremonies, and improving the development workflow. Developing the company's product using .NET and SQL Server, with a primary focus on API integrations.

Company: THS Tecnologia

Start Date: June 2024

End Date: September 2024

Description: Fullstack Developer .NET and Angular

Activities: Development of new features and maintenance of existing ones in the new CICC-SP intranet system, using ASP.NET, SQL Server, and Angular. Architecture focused on Clean Architecture and CQRS.

Company: Smart Travel

Start Date: November 2022

End Date: June 2024

Description: Fullstack Developer .NET and Angular

Activities: Development of new features, maintenance, and bug fixes in SmartBus, a bus ticket sales and management system, using ASP.NET (framework 4.6, and versions 7 and 8), SQL Server, Angular, and RabbitMQ. I was responsible for creating two projects from scratch, including both architecture design and coding, aimed at processing high-volume batch data. Both projects used Clean Architecture, one with CQRS, with inter-project communication via RabbitMQ queues and REST. The new systems also represented a significant improvement in the implementation of multitenancy.

Company: Prodesp

Consulting Firm: G&P

Start Date: June 2022

End Date: September 2022

Description: Backend .NET Developer

Activities: Backend development using ASP.NET 6, SQL Server, MongoDB, RabbitMQ, and Node.js, among other technologies, in a microservices architecture with CQRS. Worked on the SP Diário Oficial (Official Gazette) project, where I contributed to small projects, including developing a PDF document generation project from scratch in NodeJS, using RabbitMQ queues within Clean Architecture.

Company: Farmarcas

Consulting Firm: Pasquali Solution

Start Date: July 2021

End Date: June 2022

Description: Fullstack Developer .NET and Angular

Activities: Development of new features, maintenance, and bug fixing for Radar, a system providing a range of management tools for associated entrepreneurs. We primarily used ASP.NET Core for the APIs, Angular for the frontend, and MySQL for the database, along with other surrounding technologies. I also helped implement queuing using RabbitMQ, and I was responsible for developing several important epics as a full-stack developer.

Company: Banco BS2

Consulting Firm: K2

Start Date: July 2020

End Date: June 2021

Description: .NET Developer

Activities: Maintenance, bug analysis and resolution, implementation of new features in .Net Core APIs, using CQRS, RabbitMQ (which I helped to implement), SQL Server, and integration with other systems. I worked in the Corporate Charges squad/microservice, and I was the Security Champion for the team, also participating in the Information Security squad, working with the SI team to ensure best security practices and address potential vulnerabilities. I had a strong role in generating PDF payment slips and rewriting CNAB (file for batch import of payment slips) generation to support high-volume batch data processing.

Company: Itaú

Consulting Firm: Certsys

Start Date: September 2019

End Date: March 2020

Description: .NET and Angular Developer

Activities: I was one of the developers responsible for migration and enhancement (full code rewriting) of an internal legacy MPA system (Asp.net MVC) to SPA with Angular and .NET Core. The project was a script and routine control system to be requested by non-privileged users. The front-end was redesigned for a more user-friendly and aesthetically pleasing interface, and the back-end was restructured to meet the new front-end requirements and migrate to .NET Core. This was a temporary contract that ended when the allocated hours were completed.

Company: Santander

Consulting Firm: Indra

Start Date: March 2019

End Date: September 2019

Description: Front-end Developer in Angular 7

Activities: I was responsible for developing the front-end of the National Customer Registry, a crucial internal system undergoing a complete rewrite to allow various types of queries across the entire customer database. I designed the frontend architecture from scratch, including both the programming logic and layout, and coded most of it until my departure. I did not work on the backend in this project.

Company: XMS Business Solutions (Chile)

Start Date: March 2018

End Date: November 2018

Description: Developer in .Net, .Net Core, AngularJS, and Angular

Activities: Consultancy and system development using ASP.NET (Framework and Core), C#, SQL Server, AngularJS, and Angular. As part of a software development outsourcing company, I participated in the development of several products from start to finish as a full-stack .NET + Angular developer, also contributing to entity modeling. Among these projects, highlights include the post-sale control system for SalfaCorp, a major engineering firm in Chile, an online course system, and another complete evaluation system that allowed for exam creation with various question types, automatic correction for objective questions, and teacher evaluation for subjective questions.

Company: Confitec

Start Date: August 2013

End Date: October 2016

Description: Systems Analyst and .NET Developer

Activities: I worked on developing the company's main proprietary product, Gepro, a system that generated reports and flagged potential inconsistencies in the databases of major insurers in Brazil, and Portal do Corretor (Broker Portal), an internal system for Brasil Brokers company. In this systems, which were built using Asp.net Webforms, Crystal Reports, and MS SQL Server, I gained extensive experience in creating and maintaining stored procedures, which served as the source for many Crystal reports. Main technologies used: Asp.net, C#, and SQL Server.

Later, I worked on the Portal do Corretor (Broker Portal), an internal system for Brasil Brokers company, used by brokers and internal administration, where properties and clients were registered, including potential customers with their interests and sales. This was the project to which I dedicated the most time in the company.

Occasionally, I also assisted on the Brasil Brokers website from another team.

Additionally, I contributed to the initial development of Girus, a new system similar to Gepro, for reinsurance.

My responsibilities included error analysis, new module and feature development, requirements gathering with clients, and documentation writing. Main technologies used: Asp.net, C#, and SQL Server.

Company: IMAGO IT Solutions

Start Date: January 2013

End Date: June 2013

Description: Web Development Intern using ASP.NET

Activities: Error analysis and resolution, assistance in developing new systems, documentation writing, and manual testing. Main technologies used: Asp.net, C#, and SQL Server. The main client I worked for was Cultura Inglesa, where I contributed to the development of a distance learning portal (online courses) and maintenance of an Asp Classic system.

In addition to the experiences listed above, prior to these, I completed two other internships as a developer, worked twice in technical support, worked as a maintenance technician at Caixa Econômica (brazilian public bank), and my first job was as a call center agent for Tim, at the age of 18.

About Me (Personal Section)

I enjoy programming, singing, and playing acoustic guitar.

I also enjoy studying various subjects like economics, philosophy, mathematics, politics, and theology, having read some books in these areas. I completed one year of a Mathematics degree and continue studying independently.

I am a critical and sincere person and consider constructive feedback essential for continuous improvement while always respecting individuals.

I am a fast learner, and much of my knowledge comes from self-study, including books, articles, courses, blogs, and videos.

I have a “perfectionist” approach and I aim to carry out my work to the best of my abilities. I am always pursuing knowledge to enhance my skills.

I do not adapt well to chaotic, disorganized environments or where there is a lack of mutual respect.

I work well in team settings, always aiming to maintain good relationships with colleagues, leaders and direct reports. I have leadership abilities, both interpersonally and technically.

I am outgoing but maintain seriousness in important matters.

Appendix – List of Most Important Courses

This is not a descriptive list of all courses, but rather a selection of the most significant ones. Some courses have been combined into a single item for easier viewing. The full list (available online) can be seen by clicking the titles, when available.

Udemy

- [Microsoft Azure: \[Learn from Scratch\] \(9.5h\) – by Gustavo Henrique Malta Magella](#)

Eduardo Pires - Training and Consulting

- [ASP.NET MVC 5 – Enterprise Applications \(24h\)](#)
- [Software Architecture .NET \(24h\)](#)
- [ASP.NET Core and Angular 4 \(50h\)](#)

[Desenvolvedor.IO](#)

Completed Certifications:

- Software Architect Training (54h)
- Front-End Angular Expert Training (27h)

Completed Courses (Summary):

- ASP.NET Core Enterprise Applications, ASP.NET MVC Core (55h)
- Software Architecture, DDD (33h)
- Mastering Software Testing (21h)
- Entity Framework Core (21h)
- Fundamentals of IdentityServer4 (3h)

Alura

Completed Tracks:

- Node.js Career Track (76h)
- Node.js Developer Career Track
- Full-Stack MEAN Developer Career Track

Completed Courses (Summary):

- HTTP (20h)
- JavaScript (6 courses - 78h, including browser, IndexedDB, design patterns, functional paradigm, and unit tests)
- Node.js (52h)
- Angular (6 courses - 86h)
- React (14h)
- Scrum and Agility (8 courses - 48h)
- C#, EF, MongoDB, and Selenium (12 courses - 108h)
- Git (30h)
- Windows and Linux (17h)
- Networks (25h)
- Docker and Kubernetes (3 courses - 30h)
- Azure (12h)

Alura Língua

5 modules completed - Beginner, Basic, Pre-Intermediate, Intermediate, and Advanced (20h each - 100h total)
