Full-Stack Web Developer Software Architect and Tech Lead .NET API, MVC, and Angular

Profile Summary

I am a **Full-Stack Web Developer**, specialist level, focused on **Software Architecture**, and with experience as a Tech Lead and Architect. My specialties are C#, Asp.net Core, Angular, and Node.JS, using Typescript.

I am legally registered as a contractor (CNPJ holder) in Brazil.

I began my career in 2009 and graduated with a Bachelor's degree in Computer Science in 2014, and I have completed several additional courses in the area, in addition to having read several books.

I have been working with full-stack web development since 2012, and I have worked in the most diverse areas: large banks, fintechs, software factories, online courses, real estate, pharmaceutical management, public sector, etc. I have worked on the most diverse types of systems, large and small, legacy and modern, and with the most diverse products, architectures, and teams.

As a full-stack developer, I develop Web systems end-to-end: Front-end, following specified layout, with optimization and performance techniques, using well-known frameworks such as Angular, Bootstrap, and Material, or pure, vanilla CSS/JS; Back-end, with strong knowledge in architectural styles and patterns, DDD, Clean Code, TDD (unit tests), BDD (acceptance tests), microservices, etc., and advanced knowledge in C#; and Database, with queries, modeling, optimization (query improvement, index creation, normalization/denormalization), creation of functions, views, procedures, and triggers (T-SQL), and also knowledge in NoSQL (MongoDB, Redis). As ORMs, I use Entity Framework and Dapper, and I also know ADO.NET, if necessary.

I have experience in queuing and messaging with RabbitMQ and Hangfire.

Regarding Agile Project Management, I have advanced knowledge of Scrum, being able to act even as a Scrum Master, in addition to other agile methods, such as Kanban and XP.

I am a professional open to communication and deeply committed to the result of my deliveries, especially their quality. Software, besides working and being delivered on time, must be well written.

I have great conversation skills in Spanish. In English, I have good reading skills, and I can work on international projects in English, as long as the communication is written.

I believe software development is an art.

Technical Skills

Technologies:

Front-end:

Angular, AngularJS, React, Vue.js, ASP.NET MVC, Blazor, HTML5, CSS3, Sass, Javascript (ES5 and ES2015), TypeScript, Bootstrap, Material, jQuery.

Back-end:

C#, ASP.NET (MVC Server Side with Razor and Web API/REST HTTP with MVC and Minimal API), .NET Core, Entity Framework, RabbitMQ, Identity Core (.Net Authentication), Javascript (ES5 and ES2015), TypeScript, NodeJS, Hangfire.

Databases:

Relational: SQL, MS SQL Server, T-SQL (Transact-SQL), MySQL, ER Model, ER Diagram, Stored Procedures, Views, Functions, Triggers.

NoSQL: MongoDB, Redis.

DevOps:

GIT (command-line), Docker, Docker Swarm, Kubernetes, Azure, AWS.

Testing:

Selenium, XUnit, Karma/Jasmine, SpecFlow, Reqnroll, Cucumber (JS), K6.

UML (Diagrams):

Use Case, Class, Object, Package, Sequence, Communication, State Machine, Activity, Interaction Overview, Component, Deployment, Composite Structure, Timing.

Patterns:

Design:

Command, Template Method, Strategy, Singleton, Monostate, Null Object, Factory Method, Abstract Factory, Observer, Adapter, Facade, Repository, Builder, DAO, Proxy, Promise, Module (Javascript), Unit of Work, Active Object, Mediator, Composite, Abstract Server, Bridge, Gateway, Visitor, Acyclic Visitor, Extension Object, Decorator, State.

Architecture:

DDD, Clean Architecture, CQRS, BOLOVO (BLL), Onion Architecture, Ports and Adapters (Hexagonal), Event Driven, Event Sourcing, Vertical Slice, Screaming Architecture.

Code Quality:

Clean Code, DRY, YAGNI, KISS.

Agile Methodologies:

Scrum, Kanban, XP, TDD, BDD.

Academic Background

Universidade Veiga de Almeida (Veiga de Almeida University)

Bachelor's in Computer Science

Start: 2009 – Completion: 2014

Portfolio

I have several projects on GitHub, including libraries I developed and tests I performed during selection processes. Here are the links:

- [ResultPattern](#) – A .Net library that implements the Result Pattern within the .Net.
- [ngx-show-form-errors](#) - Angular library to automate displaying form error messages.
- [CashFlow](#) – A test that simulates cash flow entries and reports using .Net, with unit testing (XUnit), behavior-driven testing (BDD), and load testing (K6), containerized in Docker. PostgreSQL was used as the database, with logs sent to SEQ.
- [BestRoute](#) – A test for calculating the best route. Given N routes, the .Net API calculates the cheapest path from one node to another. A classic Graph problem, solved using Dijkstra's algorithm, with unit tests written in XUnit.
- [Test-C](#) – A test for a simple .Net API to search for products, with some simulated business rules and an in-memory database.

Additional Courses

I have taken numerous courses primarily with “Eduardo Pires - Treinamentos e Consultoria” (Eduardo Pires - Training and Consulting), “Desenvolvedor.IO” (Developer.IO) and “Alura”.

On these platforms, I have completed countless courses on topics including Asp.net, JavaScript, Angular, Software Architecture, Testing, DDD, TDD, Scrum, Node.js, Databases, Design Patterns, best practices, performance, DevOps, and more.

I was also an Alura Língua subscriber, completing level 5 (advanced) in English.

Listing all courses would be excessive, so I created an appendix at the end with the most important ones. Here are links with full certificates from the three platforms:

- [Desenvolvedor.IO](#)
- [Alura](#)
- [Alura Língua](#)

Books

Some books that have been crucial to my career include:

- **Clean Code: A Handbook of Agile Software Craftsmanship**, *Robert Martin*
- **The Clean Coder: A Code of Conduct for Professional Programmers**, *Robert Martin*
- **Agile Principles, Patterns, and Practices in C#**, *Robert Martin*
- **Scrum: The Art of Doing Twice the Work in Half the Time**, *Jeff Sutherland*
- **Test-Driven Development: Real World Testing and Design with .NET***, *Mauricio Aniche*
- **eXtreme Programming: Practices for Agile Software Development***, *Daniel Wildt, Dionatan Moura, Guilherme Lacerda, Rafael Helm*
- **Agile Metrics: Achieve Better Results with Your Team***, *Raphael Donaire Albino*
- **Domain-Driven Design: Tackling Complexity in the Heart of Software**, *Eric Evans*
- **UML 2: A Practical Guide***, *Gilleanes T. A. Guedes*
- **.NET Microservices: Architecture for Containerized .NET Applications**, *Cesar de la Torre, Bill Wagner, Mike Rousos* (currently on hold)

*free translation.

Languages

Portuguese: Native.

Spanish:

Intermediate - spoken, written.

Advanced - reading, comprehension.

English: Intermediate (Good reading comprehension, but not yet ready for live conversation).

Professional Experience

Company: MeuCashCard

Consulting Firm: SquadPremium

Start Date: December 2024

End Date: April 2025

Description: Tech Lead and Fullstack Developer (.NET and Angular)

Activities: Acting as a Tech Lead in a team of 7 developers, assisting the team in task development, understanding the architecture, maintaining best practices and company conventions, Code Reviews (Pull Request analysis), leading ceremonies, and improvements in the development workflow and processes. I also managed the team's blockers, solving them directly with other departments or external companies. Developing in the company's internal product, which dealt especially with integrations with several external systems, using REST, SOAP, and even RPA (automation) with Selenium, and making them available for internal consumption through proprietary APIs. Queuing was also implemented using Hangfire. Main tools: .NET, SQL Server, Azure DevOps, and AWS. Internal portal developed in Angular. Temporary contract project.

Company: THS Tecnologia

Start Date: June 2024

End Date: September 2024

Description: Fullstack Developer .NET and Angular

Activities: Creation of the new intranet system of CICC-SP, developing new features and maintaining existing ones. Architecture focused on Clean Architecture and CQRS, using ASP.NET, SQL Server, and Angular.

Company: Smart Travel

Start Date: November 2022

End Date: June 2024

Description: Fullstack Developer .NET and Angular

Activities: Development of new features, maintenance, and bug fixes in SmartBus, a bus ticket sales and management system, using ASP.NET (framework 4.6, and versions 7 and 8), SQL Server, Angular, React and RabbitMQ, in a three-tier architecture system (BLL, DAL, UI). I also acted as an architect, where I was responsible for the creation of two projects from scratch, both in architecture design and coding, aiming at asynchronous processing of high-volume batch data. The projects were created to be the new standard models for the company's future projects. In them, I introduced new patterns and technologies to the company, implementing integration with queuing using RabbitMQ, logs in Elasticsearch using Serilog, Result Pattern for error handling, and new architecture patterns, both using Clean Architecture, and one of them, CQRS. The new systems also represented significant improvement in the multitenant implementation compared to the previous one, with a redesigned solution from scratch, making the database connection dynamic according to the selected client.

Company: Prodesp

Consulting Firm: G&P

Start Date: June 2022

End Date: September 2022

Description: .NET Developer

Activities: Development using ASP.NET 6, React, SQL Server, MongoDB, RabbitMQ and NodeJS, among other technologies, in a microservices architecture with CQRS. Worked on the project to rewrite the São Paulo Official Gazette from scratch. Participated in the creation of some .NET projects, and notably, was responsible for the creation from scratch of a project in NodeJS, using RabbitMQ queues and Clean Architecture.

Company: Farmarcas

Consulting Firm: Pasquali Solution

Start Date: July 2021

End Date: June 2022

Description: Fullstack Developer .NET and Angular

Activities: Development of new features, maintenance and bug fixing in Radar, the company's main system, which provides various management tools for partner entrepreneurs. Radar included features such as registration of partners and products, marketing campaign management, and even a small embedded e-commerce. We mainly used ASP.NET Core in the APIs, Angular for the frontends and MySQL as the database, in addition to other surrounding technologies. I also helped implement queues using RabbitMQ and was responsible for the full development of several epics from end to end as a fullstack.

Company: Banco BS2

Consulting Firm: K2

Start Date: July 2020

End Date: June 2021

Description: .NET Developer

Activities: Maintenance, analysis and bug fixing, implementation of new features in .NET Core APIs, with CQRS, SQL Server and integration with other systems. I also helped implement process queuing with RabbitMQ. I worked in the Corporate Charges squad/microservice, and acted as the team's Security Champion, an essential role in integration with the Information Security squad, of which I was also a part, helping the team to promote better security practices and correct possible vulnerabilities. Had a strong role in PDF slip generation and in the complete rewriting of CNAB generation module to support high-volume batch data processing.

Company: Itaú

Consulting Firm: Certsys

Start Date: September 2019

End Date: March 2020

Description: .NET and Angular Developer

Activities: I was one of the developers responsible for migration and enhancement (complete code rewriting) of a legacy internal MPA system (old ASP.NET MVC) to SPA with Angular and .NET Core. The

project consisted of a control and management system for scripts and routines requested by non-privileged users. The frontend was redesigned for a better and more user-friendly and aesthetically pleasing interface, and the backend was refactored to meet the new frontend and be replaced by the .NET Core version. Integration tests were performed using Selenium. It was a temporary contract that ended when the allocated hours were used up.

Company: Santander

Consulting Firm: Indra

Start Date: March 2019 **End Date:** September 2019

Description: Front-end Developer in Angular 7

Activities: I was responsible for developing the front-end of the National Customer Registry, a crucial internal system undergoing a complete rewrite to allow various types of queries across the entire customer database. I designed the frontend architecture from scratch, including both the programming logic and layout, and coded most of it until my departure. I did not work on the backend in this project.

Company: Bom Pra Crédito

Start Date: December 2018 **End Date:** February 2019

Description: Developer in .Net, .Net Core, AngularJS, Angular, and NodeJS.

Activities: Development of new features and bug fixes in the company's systems. The main system was a personal loan offer comparison platform, developed using .Net, Angular, and AngularJS. A migration to .Net Core was in progress. Other internal projects also used technologies such as NodeJS and Python. I also worked on creating queries for MongoDB and managing the execution of some RPA processes built with Selenium.

Company: XMS Business Solutions (Chile)

Start Date: March 2018 **End Date:** November 2018

Description: Developer in .Net, .Net Core, AngularJS, and Angular

Activities: Consultancy and system development using ASP.NET (Framework and Core), C#, SQL Server, AngularJS, and Angular. As part of a software development outsourcing company, I participated in the development of several products from start to finish as a full-stack .NET + Angular developer, also contributing to entity modeling. Among these projects, highlights include the post-sale control system for SalfaCorp, a major engineering firm in Chile, an online course system, and another complete evaluation system that allowed for exam creation with various question types, automatic correction for objective questions, and teacher evaluation for subjective questions. In-person placement in Santiago, Chile.

Company: Confitec

Start Date: August 2013 **End Date:** October 2016

Description: Systems Analyst and .NET Developer

Activities: I worked on developing the company's main proprietary product, Gepro, a system that generated reports and flagged potential inconsistencies in the databases of major insurers in Brazil, and Portal do Corretor (Broker Portal), an internal system for Brasil Brokers company. In this systems, which were built

using Asp.net Webforms, Crystal Reports, and MS SQL Server, I gained extensive experience in creating and maintaining stored procedures, which served as the source for many Crystal reports. Main technologies used: Asp.net, C#, and SQL Server.

Later, I worked on the Portal do Corretor (Broker Portal), an internal system for Brasil Brokers company, used by brokers and internal administration, where properties and clients were registered, including potential customers with their interests and sales. This was the project to which I dedicated the most time in the company.

Occasionally, I also assisted on the Brasil Brokers website from another team.

Additionally, I contributed to the initial development of Girus, a new system similar to Gepro, for reinsurance.

My responsibilities included error analysis, new module and feature development, requirements gathering with clients, and documentation writing. Main technologies used: Asp.net, C#, and SQL Server.

Company: IMAGO IT Solutions

Start Date: January 2013

End Date: June 2013

Description: Web Development Intern using ASP.NET

Activities: Error analysis and resolution, assistance in developing new systems, documentation writing, and manual testing. Main technologies used: Asp.net, C#, and SQL Server. The main client I worked for was Cultura Inglesa, where I contributed to the development of a distance learning portal (online courses) and maintenance of an Asp Classic system.

In addition to the experiences listed above, prior to these, I completed two other internships as a developer, worked twice in technical support, worked as a computer maintenance technician at Caixa Econômica (brazilian public bank), and my first job was as a call center agent for Tim, at the age of 18.

About Me (Personal Section)

I enjoy programming, singing, and playing acoustic guitar.

I also enjoy studying various subjects like economics, philosophy, mathematics, politics, and theology, having read some books in these areas. I completed one year of a bachelor's degree in Mathematics and today I try to study independently.

I am a fast learner, and most of my studies are self-taught, using a wide range of sources: books, articles, courses, blogs, videos, etc.

I value transparency, honesty, and respect. I am proactive, but I also take care to respect team guidelines and hierarchy.

I always strive to do my work in the best way possible, delivering real and lasting value, and I'm constantly seeking knowledge to improve my skills.

I do not adapt well to environments of chaos, disorder and where people don't treat each other with respect. However, I have enough study and experience to help improve processes and bring order to a team, if given that responsibility.

I work well in team settings, always aiming to maintain good relationships with colleagues, leaders and direct reports, with respect and cordiality. I have leadership abilities, both interpersonal and technical, and have already served as a Technical Leader.

I am outgoing but maintain seriousness in important matters.

Appendix – List of Most Important Courses

This is not a descriptive list of all courses, but rather a selection of the most significant ones. Some courses have been combined into a single item for easier viewing. The full list (available online) can be seen by clicking the titles, when available.

Udemy

- [Microsoft Azure: \[Learn from Scratch\] \(9.5h\) – by Gustavo Henrique Malta Magella](#)
- [AWS from scratch: learn cloud with real scenarios \(13.5h\) - by Gabriel Vilete, Pense Nuvem](#)

Eduardo Pires - Training and Consulting

- [ASP.NET MVC 5 – Enterprise Applications \(24h\)](#)
- [Software Architecture .NET \(24h\)](#)
- [ASP.NET Core and Angular 4 \(50h\)](#)

[Desenvolvedor.IO](#)

Completed Certifications:

- Software Architect Training (54h)
- Front-End Angular Expert Training (27h)

Completed Courses (Summary):

- ASP.NET Core Enterprise Applications, ASP.NET MVC Core (55h)
- Software Architecture, DDD (33h)
- Mastering Software Testing (21h)
- Entity Framework Core (21h)
- Fundamentals of IdentityServer4 (3h)

Alura

Completed Tracks:

- Node.js Career Track (76h)
- Node.js Developer Career Track
- Full-Stack MEAN Developer Career Track

Completed Courses (Summary):

- HTTP (20h)
- JavaScript (6 courses - 78h, including browser, IndexedDB, design patterns, functional paradigm, and unit tests)
- Node.js (52h)
- Angular (6 courses - 86h)
- React (14h)
- Scrum and Agility (8 courses - 48h)
- C#, EF, MongoDB, and Selenium (12 courses - 108h)
- Git (30h)
- Windows and Linux (17h)
- Networks (25h)
- Docker and Kubernetes (3 courses - 30h)
- Azure (12h)

Alura Língua

5 modules completed - Beginner, Basic, Pre-Intermediate, Intermediate, and Advanced (20h each - 100h total)
